

3.6V 2400mAh Lithium-Ion Rechargeable Battery

This is a 3.6V 2400mAh lithium-ion rechargeable battery designed as a replacement or spare for compatible electronic devices. It is labeled with safety warnings, including cautions against improper connections, disposal in fire, crushing, and short-circuiting external contacts.

Overview

Reliable Power Solution

This 3.6V 2400mAh lithium-ion rechargeable battery is engineered to serve as a dependable power source for compatible electronic devices. Designed for longevity and performance, it provides a stable voltage output suitable for various portable equipment. The unit includes essential safety features and certifications to ensure secure operation when handled according to guidelines.

Technical Specifications

Voltage	3.6 V
Capacity	2400 mAh
Chemistry	Lithium-Ion (Li-ion)

Compliance & Safety

Safety Instructions

- Use specified charger only
- Do not dispose of in fire
- Do not crush
- Avoid short-circuiting external contacts
- Ensure proper connections

Country of Origin

Made in China

Certifications

CE
