

3.6V 4.4Wh Rechargeable Lithium-Ion Battery

This is a rechargeable lithium-ion battery pack with a voltage of 3.6V and a capacity of 4.4Wh. It is designed for use in compatible electronic devices and features protection circuitry and durable construction for reliable performance.

Overview

High-Performance Lithium-Ion Power

This rechargeable lithium-ion battery pack is engineered for consistent and reliable power delivery in compatible electronic devices. Featuring integrated protection circuitry and robust construction, it ensures safety and longevity during operation. Designed to meet standard voltage requirements, this unit is an ideal choice for professional-grade equipment needing a stable power source.

Technical Specifications

Nominal Voltage	3.6 V
Energy Capacity	4.4 Wh
Battery Chemistry	Lithium-Ion
Model Number	NP-FR1
Alternate Voltage Rating	3.8 V
Internal Part Code	GP106

Features

Safety & Construction	Protection Circuitry, Durable Construction, Rechargeable
