

3.6V Rechargeable Ni-MH Battery Pack

This is a 3.6V rechargeable Nickel-Metal Hydride (Ni-MH) battery pack. It features three AAA batteries connected in series, each with a 600mAh capacity.

Overview

Reliable Power Solution

This 3.6V rechargeable Nickel-Metal Hydride (Ni-MH) battery pack is engineered for consistent performance in a variety of electronic devices and appliances. The pack configuration features three AAA batteries connected in series, providing a stable power source. Designed for durability and efficiency, it serves as an ideal component for professional-grade electronics requiring compact, rechargeable power.

Technical Specifications

Capacity

600 mAh

Capacity per cell

Nominal Voltage	3.6 V
Battery Chemistry	Ni-MH (Nickel-Metal Hydride)
Cell Configuration	3 x AAA in series

Safety & Handling

Safety Instructions

- Do not disassemble
- Do not short circuit
- Do not dispose of in fire
- Do not mix with different battery types

Disposal

Recycle Properly
