

3.7V 2000mAh Li-Po Battery

This is a 3.7V 2000mAh lithium polymer (Li-Po) battery. It is designed for use in mobile phones, tablet PCs, and other portable electronic devices.

Product Overview

High-Performance Lithium Polymer Battery

This 3.7V 2000mAh Li-Po battery is a versatile power solution designed for modern portable electronics. With its slim profile and reliable energy density, it serves as an ideal replacement or OEM component for mobile phones, tablet PCs, and power banks. The battery is engineered for stability and long-term performance in compact device housings.

Width	64 mm
Length	90 mm

Technical Details

Model Number	356490
Battery Type	Lithium Polymer (Li-Po)

Applications

Target Applications

- Mobile Phones
- Tablet PCs
- Power Banks
- Portable Electronic Devices

Compliance & Certification

Certifications

CE • RoHS • TÜV Rheinland
