

3/8" Reversible Pneumatic Drill

This pneumatic reversible air drill is suitable for drilling and fastening applications. It features a 3/8" chuck and reversible function for efficient operation.

Product Overview

Versatile Pneumatic Drilling Solution

The LK-28 is a professional-grade 3/8" reversible pneumatic drill engineered for high-efficiency drilling and fastening tasks. Its reversible function provides critical flexibility for backing out jammed bits and removing screws, making it an essential tool for workshops and construction environments. Powered by air, this drill delivers consistent performance with a lightweight design to reduce operator fatigue during extended use.
