Overview

High-Performance Concrete Pump Truck

This 39-meter concrete pump truck is engineered for efficient and precise concrete placement on demanding construction sites. Featuring a 4-section boom with a maximum reach of 38.57 meters and a high-capacity pumping system, it ensures reliable performance for high-rise buildings and infrastructure projects. The vehicle is built on a heavy-duty 6x4 chassis, incorporating advanced hydraulic systems and user-friendly controls for safe, accurate operation.

Pumping System

Max Theoretical Throughput

203 m³/h

Max Throughput

Pumping System Details

Parameter	Value
Max Outlet Pressure	7.8 MPa
Rated Working Pressure	34 MPa
Bucket Capacity	550 L
Distribution Valve	S tube valve

Boom and Reach

Reach Capabilities

38.57 m

Max Distribution Height

34.57 m

Max Distribution Radius

Boom Structure

- Structure form: 39-4R
- Arm section number: 4
- Turning Angle: 365°
- Pipe diameter: 125 mm

Chassis and Engine

Fuel Type

Diesel

Drive Configuration

6x4

Vehicle Dimensions

12440 x 2495 x 3890 mm

Operation and Safety

Control System

Manual, Remote Control

Lubrication

Yes
