

3D 12-Line Laser Level

This is a professional layout laser level that projects 3x360° laser lines. It has an accuracy of ±1mm/5m and a self-leveling range of ±3°.

Overview

Professional 3D Laser Level

This 3D 12-line laser level is designed for precision interior construction and decoration tasks. It features versatile 3x360° laser line projection and supports both red and green beam options for varying visibility needs. Built for reliability, it includes self-leveling capabilities and a slope locking mode to ensure accurate layouts in diverse working conditions.

Laser Performance

Laser Wavelength

635 nm Red Beam	520 nm Green Beam
---------------------------	-----------------------------

Laser Class	Class II
Projection	3x360° laser lines

Performance Metrics

Working Range

10 m Red Beam	20 m Green Beam
-------------------------	---------------------------

Accuracy	1 mm/5m
Self-leveling Range	3 °

Features

Operating Modes	Self-leveling, Slope locking mode
------------------------	-----------------------------------

Power & Environment

Power Source

- 4x AA Batteries
- HY18500 3.7V 3600mAh Battery
- Type C Power Adapter

Protection Class

IP54

Operating Temperature

-10°C to +40°C
