

3G Feature Phone with App Store Access

This is a stylish 3G mobile phone. It features CDMA 2000 network compatibility and access to a large application store.

Overview

Modern Connectivity in a Classic Form Factor

This 3G feature phone combines the reliability of a traditional handset with modern connectivity features. Designed for efficiency, it supports CDMA 2000 networks and offers access to a dedicated application store for expanded functionality. With integrated support for popular communication tools like QQ and Tianyi Live, plus convenient SD card backup for your contacts, it serves as a robust communication solution for professional use.
