Overview

High-Speed Mobile Connectivity

This 3G USB Data Card provides reliable mobile broadband connectivity for GSM SIM cards, supporting multiple network standards including HSUPA, UMTS, and EDGE. Designed for versatility, it features a plug-and-play USB 2.0 interface and supports essential services such as SMS messaging, data transmission, and optional voice calling. With high-speed downlink capabilities up to 7.2Mbps and a built-in micro SD card slot for expanded storage, it serves as an efficient solution for on-the-go internet access.
