

# 3kW Power Generator

This 3kW generator is designed for power generation applications. It features robust construction with a metallic housing and ventilation slots for cooling and is equipped with mounting points for secure installation.

## Product Overview

### Reliable 3kW Power Generation

This 3kW power generator is engineered for versatile power generation applications, offering a robust solution for various operational needs. It features a durable metallic housing designed with integrated ventilation slots to ensure optimal cooling during extended use. Equipped with secure mounting points, this unit is built for stable installation and consistent performance.

## Performance Metrics

### Rated Power

**3 kW**

Rated Power

### Voltage & Frequency

Parameter	Value
Rated Voltage	220V / 240V
Frequency	50Hz / 60Hz

## Technical Specifications

Engine Unit	178F
Brush Configuration	Brush, Brushless
