

3SE3 Series Limit Switch

The 3SE3 series limit switch is a reliable electromechanical device for position sensing and control. It features a durable enclosure suitable for harsh environments and is designed for easy installation.

Product Overview

Industrial Limit Switches

The 3SE3 series limit switch is a robust and reliable electromechanical device engineered for precise position sensing and control in demanding industrial environments. Designed with a compact and durable enclosure, it is suitable for harsh operational conditions. These switches are ideal for machinery, automation systems, and safety applications where accurate position detection is critical.

Technical Specifications

The 3SE3 series includes a variety of actuator types such as plungers, levers, and rollers to suit different mechanical interfaces.

Available Models

- 3SE3 120-1B
- 3SE3 120-1C
- 3SE3 120-1D
- 3SE3 120-1E
- 3SE3 120-1G
- 3SE3 120-1R
- 3SE3 120-1T
- 3SE3 120-1U
- 3SE3 120-1W
- 3SE3 100-1B
- 3SE3 100-1D
- 3SE3 100-1E
- 3SE3 100-1F
- 3SE3 100-1G
- 3SE3 100-1R
- 3SE3 100-1T
- 3SE3 100-1U
- 3SE3 100-1W

Actuator Types

Plunger, Lever, Roller
