Product Overview

High-Performance Lithium Power

This 3V lithium coin cell battery is engineered for long-lasting performance and reliability in compact electronic devices. Utilizing an innovative core electrode technology, it offers enhanced capacity and extended shelf life, making it a dependable power source for low-drain applications. The battery is built to rigorous quality standards, ensuring stable voltage output and consistent performance.

Technical Specifications

Nominal Voltage	3 V
Battery Type	Lithium Manganese Dioxide
Model	CR2032

Quality & Compliance

Certifications & Standards	2006/66/EC, UL, SVHC, 2013/56/EU, UN 38.3
Patent Information	ZL 2014 1 0399482.2
