

3W LED Downlight for Indoor Illumination

This is a 3W LED downlight designed for general illumination. It incorporates a reflector to focus the light and a heat sink for thermal management.

Product Overview

High-Efficiency Indoor Illumination

This 3W LED downlight is engineered for general indoor lighting applications where reliability and efficiency are paramount. The design incorporates an integrated reflector for focused light output and a robust heat sink to ensure optimal thermal management and longevity. It is a versatile solution suitable for various professional and residential environments.
