

3x8mm Tape Feeder for SMT Placement

This 3x8mm tape feeder is designed for Siemens SMT placement machines. It ensures reliable and accurate component placement for optimal throughput.

Product Overview

High-Precision SMT Tape Feeder

This tape feeder is designed for high-precision component feeding in automated assembly systems. Engineered for reliability and consistent performance, it helps optimize production efficiency and minimize operational downtime in SMT assembly lines. Its durable design ensures long-term accuracy and seamless integration with compatible modular placement machinery.

Technical Specifications

Part Number	00141099-04
Feeder Size	3x8mm

Compatibility

Compatible Series	Siemens X Series, F4, F5, HS50, HS60
-------------------	--------------------------------------
