

4 1/2 Inch A60 Abrasive Cutting Wheel

This cutting wheel is designed for use with electric tools. It features A60 grade abrasive for efficient cutting of various materials.

Product Overview

High-Performance Cutting Precision

This 4 1/2 inch abrasive cutting wheel is engineered for efficient and precise cutting in demanding metalworking and construction environments. Utilizing high-quality friable aluminum oxide grains, it delivers a clean, cold cut while maintaining high safety standards. Specifically formulated for stainless steel applications, the wheel is free of iron, sulphur, and chlorine to prevent material contamination.

Technical Specifications

Diameter	4.5 inch
Thickness	0.045 inch
Arbor Hole	0.875 inch
Abrasive Grade	A60

Features & Benefits

Key Features

- Friable aluminum oxide grains
- Easy and cold cut performance
- High security design
- Specially developed for stainless steel

Material Safety	Iron-Free, Sulphur-Free, Chlorine-Free
