

4-6 Color Flexographic Printing Machine

This flexographic printing machine supports 4 to 6 colors for creating complex designs on various substrates. It is suitable for single and double-sided PE coated paper, PVC, and OPP.

Overview

Professional Flexographic Solution

The WLYS-850 is a high-performance 4-6 color flexographic printing machine designed for demanding industrial environments. Built for reliability and efficiency, it provides consistent output for complex multi-color printing tasks. Its robust design ensures minimal downtime, making it an ideal choice for businesses requiring precise and high-quality production results.

Performance

Max Printing Speed

60 m/min

Max Printing Speed

Printing Colors	6 colors
Registering Precision	±0.15mm

Dimensions

Max Paper Roll Width	850 mm
Max Printing Width	840 mm
Printing Girth	175-320mm

Handling

Max Unwinding Diameter	1500 mm
Max Rewinding Diameter	1500 mm

Power

Power Consumption	8 kw
