

4-Bottle Thermoelectric Wine Cooler

This thermoelectric wine cooler is designed to hold up to four standard-sized bottles. It features adjustable temperature control and a quiet operation.

Product Overview

Compact Thermoelectric Wine Preservation

This wall-mounted thermoelectric wine cooler is designed to store up to 4 standard-sized bottles in a space-saving, energy-efficient configuration. Its vibration-free cooling system ensures that wine sediment remains undisturbed, preserving the integrity and flavor of your collection. Featuring adjustable temperature controls and insulated UV-protective glass, it provides a professional-grade storage environment for premium hospitality or residential settings.
