

4-Cavity PET Bottle Stretch Blow Molding Machine

This PET bottle stretch blow molding machine features automatic PET preform loading and auto-fault detection. Capable of producing up to 4,000 bottles per hour with its 4-cavity design, it handles container volumes up to 2000ml and bottle necks ranging from 15mm to 48mm.

Overview

High-Efficiency Production

The 4-Cavity PET Bottle Stretch Blow Molding Machine is engineered for the high-volume production of PET containers up to 2000ML. It integrates advanced micro-computerized control systems and high-quality pneumatic components to ensure consistent quality, stable operation, and precise bottle dimensions. Designed for versatility, this machine is an ideal solution for manufacturing mineral water, carbonated beverage, oil, and daily chemical bottles.

Technical Specifications

Cavity Count	4
Maximum Bottle Volume	2000 ML
Control System	Automatic micro-computerized control with touch-screen interface

Features

Safety and Security

- Automatic fault detection
- Automatic alarm system
- Interlocking device for each action
- High-pressure/low-pressure blowing circuit

Certifications

Quality Certifications	ISO 9001, CE, CQC
