Product Overview

Professional 4-Channel Power Amplifier

The POD-4700 is a high-performance 4-channel power amplifier engineered for demanding professional audio environments. Featuring a robust toroidal transformer and advanced cooling systems, it ensures stable, reliable power delivery for long-duration operation. With versatile configuration modes including stereo, parallel, and bridge, this unit offers the flexibility required for complex sound reinforcement setups.

Technical Specifications

Number of Channels	4
Model Number	POD-4700
Operating Modes	Stereo, Parallel, Bridge

Connectivity

Input/Output Connectivity

Connection Type	Port Type
Input	XLR
Output	Speakon

Control and Monitoring

Front Panel Indicators

- Signal Presence
- Clip Indicator
- Protection Status
- Power Status
- Channel Level Meters

Channel Controls

Independent level control for each of the 4 channels

Build and Design

Internal Components

- Toroidal transformer
- High-capacity electrolytic capacitors (10000 μ F)

Cooling System

Integrated heat sinks with rear-mounted cooling fans

Mounting

Rack Mount
