

4-in-1 Juicer Blender Food Processor

This versatile 4-in-1 juicer blender offers multiple functions in a single appliance. It operates on 220-240V, 50/60Hz, and consumes 400W of power.

Overview

Versatile 4-in-1 Kitchen Solution

This multifunctional 4-in-1 kitchen appliance is designed to streamline food preparation by combining juicing, blending, and processing capabilities in a single unit. Engineered for efficiency, it features a solid-state control system with integrated safety measures like a circuit breaker reset function. Its modular design allows for quick attachment changes, making it a highly convenient and space-saving addition to any professional or home kitchen.
