

4-Inch Flexible Abrasive Grinding Wheel

This 4-inch flexible grinding wheel is designed for grinding and polishing. Its flexible construction allows for contour grinding and finishing on a variety of materials.

Product Overview

High-Performance Flexible Grinding

This 4-inch flexible abrasive grinding wheel is engineered for superior durability and consistent performance in demanding grinding and polishing applications. Featuring premium-grade grains and heavy-duty fiberglass reinforcement, it delivers efficient material removal while maintaining safety and structural integrity. Its flexible design is specifically optimized for contour grinding and achieving a smooth surface finish on a wide variety of materials.

Technical Specifications

Diameter	4 inch
Construction Features	Flexible Design, Fiberglass Reinforced, Contour Capable

Performance Metrics

Key Benefits

- Extended service life with premium grains
- High-safety double reinforcement
- Efficient material removal
- Smooth surface finishing
