

4 Inch Flexible Grinding Wheel for Metalworking

This 4-inch grinding wheel is designed for cutting and grinding applications. It has dimensions of 103x3x16 mm and a maximum speed of 13700 RPM.

Product Overview

High-Performance Flexible Grinding Wheel

This 4-inch flexible grinding wheel is engineered for demanding metalworking applications, offering superior durability and consistent performance. Constructed with premium grains and heavy-duty fiberglass reinforcement, it minimizes downtime by reducing the need for frequent replacements. Designed for safety and reliability, this tool delivers high-quality results in both cutting and grinding tasks.

Technical Specifications

Dimensions

103 mm
Diameter

3 mm
Thickness

16 mm
Bore Size

Maximum Speed: 13700 RPM

Abrasive Material: WA 80#

Compliance & Quality

Key Quality Features

- Premium abrasive grains
- Heavy-duty fiberglass reinforcement
- Double reinforcement for safety
- Rigorous quality control testing

Certifications: ISO 9001
