

4-Inch Grinding Wheel for Metal

This 4-inch grinding wheel is designed for metal applications. It features dimensions of 100x6.0x16mm and is suitable for high-speed operation.

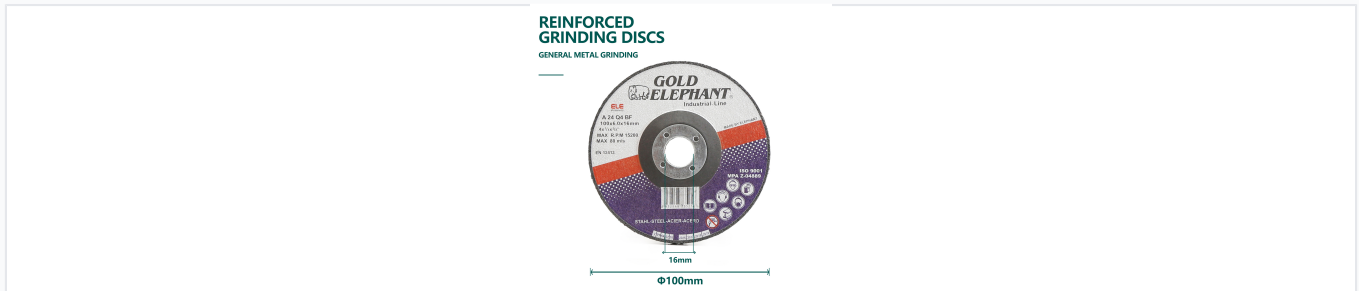

Product Overview

High-Performance Grinding Solution

This 4-inch grinding wheel is engineered for efficient material removal on various metals, including steel and stainless steel. Designed with durability in mind, it features reinforced construction to ensure high performance and safety during operation. Compliant with international safety standards, this abrasive tool is a reliable choice for professional metalworking applications.

Technical Specifications

Detailed view of the grinding disc specifications, highlighting safety compliance and operational limits.

Dimensions	100mm x 6.0mm x 16mm
Maximum RPM	15200 RPM
Maximum Operating Speed	80 m/s
Abrasive Classification	A 24 Q4 BF

Compliance & Quality

Safety Standards

Reinforced Construction • High-Speed Rated

Certifications

ISO 9001, MPA Z-04889, EN 12413

Usage

Compatible Materials

- Steel
- Stainless Steel
- General Metals
