

# 4-Inch LED Downlight with Selectable Lumen Output

This downlight is optimized for both new construction and retrofit projects. It features selectable lumen outputs and is available in multiple sizes.

## Product Overview

### Versatile 4-Inch LED Downlight

This premium 4-inch LED downlight is engineered for flexibility and performance in professional indoor lighting environments. It features a unique selectable lumen output, allowing users to switch between 600lm, 750lm, and 900lm to suit specific ambient requirements. With its integrated heat sink design and simple spring-clip installation, this fixture combines efficient thermal management with ease of deployment.

## Performance Metrics

### Selectable Lumen Output

**600 lm**

Low Setting

**750 lm**

Medium Setting

**900 lm**

High Setting

## Technical Specifications

### Thermal Design

Integrated Heat Sink

### Size Class

4-Inch

### Trim Color

White

### Installation Method

Recessed, Spring Clips

## Application

### Suitable Environments

- Indoor Residential
- Commercial Lighting
- General Recessed Applications
