

4-Inch Metal Cutting Wheel

This 4-inch cutting wheel is designed for efficient cutting of metal and stainless steel. Its super-thin design ensures minimal material waste and maximizes cutting speed.

ADDITIONAL IMAGES

Overview

Super-thin resin cutting disc designed for fast metal and stainless steel cutting.

High-Performance Cutting Efficiency

This 4-inch cutting wheel is engineered for precision and speed when working with metal and stainless steel. Featuring a super-thin design, it minimizes material waste while ensuring high hardness and wear resistance for demanding industrial tasks. The reinforced structure provides excellent resistance to stretching, impact, and bending, making it a reliable choice for professional cutting applications.

Technical Specifications

Reinforced construction with dual super-thin nets for enhanced resistance to bending and impact.

Dimensions

105 mm
Diameter

1.2 mm
Thickness

16 mm
Bore Size

Performance Ratings

80 m/s
Max Operating Speed

14500 RPM
Max RPM

Abrasive Specification

41-WA 60 T BF

Features & Compliance

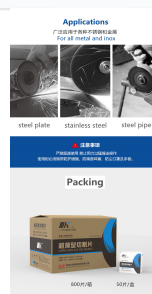

Certifications

ISO 9001 • MPA Certified

Key Features

Super-thin design, High hardness, Wear resistant, Reinforced structure

Logistics

Standard packaging configuration and safety usage guidelines.

Packaging Information

Package Level	Quantity
Box	50
Case	800

Usage

Safety Guidelines

- Do not exceed maximum operating speed
- Avoid excessive impact or force
- Wear protective eyewear
- Use ear protection
- Use dust mask and gloves
