

# 4-Inch Submersible Borehole Water Pump

Multistage submersible water pumps are designed for 4-inch deep wells. They are particularly suitable for civilian and industrial purposes, including sprinkler systems, food plants, and fire installations.

## Product Overview

### 4-Inch Submersible Borehole Pump

This 4-inch submersible pump is engineered for efficient water extraction from deep wells and boreholes. Constructed with durable stainless steel, it ensures excellent corrosion resistance and longevity in demanding environments. Featuring an integrated float switch for automatic water-level control, this unit is a versatile solution suitable for domestic water supply, agricultural irrigation, and various industrial applications.

## Operating Limits

|                        |       |
|------------------------|-------|
| Max Liquid Temperature | 35 °C |
| Max Immersion Depth    | 20 m  |

## Installation Requirements

|                       |        |
|-----------------------|--------|
| Minimum Well Diameter | 100 mm |
|-----------------------|--------|

## Design & Construction

### Key Features

Built-in Float Switch • Corrosion Resistant • Automatic Operation

|          |                 |
|----------|-----------------|
| Material | Stainless Steel |
|----------|-----------------|

## Application

### Typical Applications

- Domestic water supply
- Irrigation
- Industrial use
