

4-Inch Submersible Solar Water Pump

This 4-inch submersible solar pump is designed for efficient water extraction. It features durable stainless steel construction for longevity and corrosion resistance.

Overview

High-Performance Solar Submersible Pump

This 4-inch submersible solar water pump is engineered for efficient water extraction in demanding environments. Constructed with durable stainless steel, it offers exceptional longevity and corrosion resistance, making it an ideal choice for deep well applications, agricultural irrigation, and reliable water supply systems. By utilizing solar power, this pump provides an eco-friendly and cost-effective solution for remote water management needs.

Technical Specifications

Pump Diameter	4 inches
Material	Stainless Steel

Key Features

Key Benefits

- Eco-friendly solar operation
- Corrosion-resistant construction
- Easy installation
- Reliable performance

Ideal Applications	Deep Well, Irrigation, Water Supply Systems
