

4-Inch Ventilating Fan for Home Use

This 4-inch ventilating fan is designed for household use. It delivers 120m³/h at 25W, improving air circulation in enclosed spaces.

Product Overview

Compact Ventilation Solution

This 4-inch ventilating fan is engineered to provide efficient air circulation in small residential spaces. With a compact, square-profile design, it is suitable for wall or ceiling mounting to maintain air quality. It balances whisper-quiet operation with consistent performance to ensure a comfortable indoor environment.
