

4-Pole 40A Contactor

This 4-pole, 40A contactor is designed for HVAC&R applications, particularly in air conditioning systems. It is suitable for hermetic refrigeration compressors and is designed to break all lines.

Product Overview

Professional Grade SA Series Contactor

The SA series 4-pole contactor is engineered for reliable switching performance in HVAC and refrigeration applications. Designed to break all lines, this component is ideal for hermetic refrigeration compressors and various air conditioning control systems. Its robust build ensures long electrical and mechanical life, providing dependable operation for demanding electrical environments.

Electrical Ratings

Main Circuit Specifications

40 A

Full Load Current

600 V

Max Voltage

24 VAC

Coil Voltage

Operating Life Expectancy

Load Type	Cycles
Resistance Load	250000
Horsepower Load	100000
Mechanical Life	1000000

Technical Details

Configuration

- 4 Poles
- Frequency: 50/60 Hz
- Voltage range: 24V-480V

Terminal Torque Specifications

- Screws: 22 in-lbs
- Lugs: 40 in-lbs (Copper conductors at 75°C)

Standards & Compliance

cULus, UL, CSA
