Overview

Heavy-Duty Dual Gear Hand Puller

This 4-ton hand puller is engineered for demanding tasks in power transmission construction and telecommunications engineering. Featuring a robust dual gear system and a heavy-duty, zinc-plated steel frame, it ensures smooth load application with minimal operator effort. With three drop-forged steel hooks equipped with safety latches, this tool provides a secure, reliable solution for conductor and cable tensioning.

Maximum Capacity

4 Ton

Max Capacity
