

4-Ton Hydraulic Bottle Jack

This hydraulic bottle jack provides a 4-ton lifting capacity. It is designed with a minimum height of 180mm and a maximum height of 340mm.

Product Overview

Professional Hydraulic Bottle Jack

This hydraulic bottle jack is engineered for reliable lifting performance in automotive and industrial environments. Featuring a robust steel plate bottle and base construction, it ensures stability and durability under load. The design includes specialized seals to prevent oil leakage, maintaining system integrity and keeping hydraulic oil clear during operation.
