

4" x 1 1/2" x 1 1/4" Grinding Wheel

Grinding wheel measuring 4" x 1 1/2" x 1 1/4" for various grinding applications. It is designed for efficient material removal and surface finishing.

Product Overview

Black Silicon Carbide Grinding Wheel

This 4-inch grinding wheel is engineered with high-quality black silicon carbide, specifically designed for efficient material removal. It is ideal for grinding materials with low tensile strength, including gray cast iron, non-ferrous metals, and various non-metallic substances. Its versatility extends to processing stone, ceramics, glass, and refractory materials, making it a reliable choice for diverse industrial applications.

Technical Specifications

Dimensions

4 inch

Diameter

1.5 inch

Width

1.25 inch

Arbor Size

Abrasive Material

Black Silicon Carbide

Applications

Compatible Materials

- Gray cast iron
- Non-ferrous metals
- Stone
- Ceramics
- Glass
- Refractories
- Silicate materials

Primary Use

Grinding • Material Removal
