

4 x 1/4 x 3/4 Abrasive Grinding Wheel

Abrasive grinding wheel measures 4 x 1/4 x 3/4 inches. Constructed with high-quality abrasive grains, it is designed for efficient material removal and long-lasting performance.

Product Overview

High-Performance Grinding Wheel

This white aluminum oxide grinding wheel is engineered for precision grinding and material removal. It is specifically designed to handle high-hardness materials, including high-speed steel, high-carbon steel, hardened steel, and various alloy steels. Its durable construction ensures efficient performance across diverse applications in metalworking, woodworking, and general fabrication.

Technical Specifications

Diameter	4 inch
Thickness	0.25 inch
Arbor Hole	0.75 inch

Material & Compatibility

Primary Applications

- Grinding
- Shaping
- Finishing
- Material Removal

Abrasive Material	White Aluminum Oxide
Compatible Materials	High Speed Steel, High Carbon Steel, Hardened Steel, Alloy Steel

Key Metrics

Performance Metrics

4 in Diameter	0.25 in Thickness
