

4.0 HP Gasoline Engine for Power Generation

This 4.0 HP gasoline engine is designed for power generation. It is a reliable and efficient power source for various equipment.

Product Overview

High-Performance Gasoline Engine

This 4.0 HP gasoline engine is engineered specifically for reliable power generation applications. Designed with durability and fuel efficiency in mind, it provides a robust power source for essential machinery such as pumps and generators. Its compact design ensures versatility for various industrial and commercial equipment needs.

Technical Specifications

Power Output

4 HP

Rated Power

Model Designation

EH122D

Suitable Applications

Power Generation, Water Pumps, Industrial Machinery
