

4.0 HP Small Engine

This 4.0 HP engine is designed for various applications. Its compact and durable design makes it suitable for powering small machinery and equipment.

Overview

Compact Power Solution

This 4.0 HP small engine is engineered for versatility and reliability in demanding environments. Featuring an OHV (Overhead Valve) design, it ensures efficient combustion and consistent performance for a variety of small machinery. Its compact and durable build makes it an ideal choice for powering lawnmowers, generators, water pumps, and similar equipment.
