

400 kVA Diesel Power Generator

This generator delivers 400 kVA of power, suitable for a variety of demanding applications. It features a high-performance engine and durable alternator for reliable and efficient power generation.

Overview

High-Performance 400 kVA Power Generation

This robust 400 kVA diesel generator is engineered for reliable and efficient power supply in industrial, commercial, and emergency backup scenarios. Designed for stability and durability, it features high-performance internal components and a ruggedized enclosure suitable for demanding environments. Its sophisticated control interface ensures straightforward monitoring and operation, meeting essential industry standards for safety and performance.

Technical Specifications

Power Output

400 kVA

Rated Power

440 kVA

Maximum Power

Engine Compatibility

2206C-E13TAG3

Compatible Alternators

Stamford, Leroy Somer, Mecc Alte

Configuration & Logistics

Available Enclosures

- Open Type
- Soundproof

Warranty

12 months

Delivery Lead Time

30 days after deposit confirmation
