

# 4000kg Wheel Loader for Construction

This 4000kg wheel loader is designed for optimal performance and efficiency in construction and industrial applications. It features a robust hydraulic system for powerful lifting and digging capabilities.

## ADDITIONAL IMAGES

## Overview

### Heavy-Duty Construction Performance

The 4000kg wheel loader is a versatile and powerful solution designed for demanding construction, mining, and agricultural applications. Engineered for efficiency, it features a high-torque engine and a robust hydraulic system that delivers smooth, precise control during material handling tasks. With an ergonomic operator cabin and heavy-duty construction, this machine ensures both productivity and operator comfort in challenging work environments.

## Performance

### Key Performance Metrics

**4000 kg**

Rated Load

**2.35 m<sup>3</sup>**

Bucket Capacity

**124 kN**

Max Tractive Force

### Operational Specifications

Feature	Value
Overall Weight	13200 kg
Max Dump Height	3176 mm
Max Dump Reach	1095 mm
Min Turning Radius	6052 mm
Max Grade Ability	30°

## Engine & Transmission

Engine Model	6BTA5.9-C180
Rated Power	132 kW
Maximum Torque	750 N.m
Transmission	4 Forward, 3 Reverse (Electric control)
Maximum Speed	38 km/h

## Hydraulic System

System Working Pressure	18 MPa
Auto-Leveling Function	Yes

## Options & Extras

### Warranty & Delivery

- Warranty Period: 1 Year
- Delivery Time: 30-40 days
- Shipping: 1 unit per 40HQ container

Optional Equipment	Quick-hitch, Fork, ROPS Cabin
