

4000W Dual Fuel Digital Inverter Generator

This digital inverter generator provides a portable power solution for various applications. It features switch-on-demand technology, allowing for efficient fuel consumption and reduced noise levels.

Overview

Versatile Power Solution

The 4000W Dual Fuel Digital Inverter Generator offers a reliable and portable power solution suitable for both professional and recreational applications. Featuring advanced inverter technology with THD < 3%, it delivers clean, stable power that is safe for sensitive electronics while maintaining an ultra-quiet operation. Its dual-fuel capability allows for flexible operation using either gasoline or propane, making it an ideal choice for camping, job sites, and emergency backup power.

Performance

Power Output

4000 W

Starting Watts (Gasoline)

3500 W

Running Watts (Gasoline)

Fuel Performance Table

Fuel Type	Starting Watts	Running Watts
Gasoline	4000	3500
Propane	3500	3200

Technical Details

Key Features

- One-button start
- Remote control
- ATS (Automatic Transfer Switch)
- USB charging ports
- Parallel operation capability
- Low-idle fuel saving mode
- Digital display

Noise Level	62 dBA
-------------	--------

Total Harmonic Distortion (THD)	< 3%
---------------------------------	------

Compliance

Certifications	EPA, CARB, CE, ROHS, EURO V
----------------	-----------------------------
