

4000W Portable Power Generator

This power generator delivers 4000W of power with a rated voltage of 230V and a frequency of 50Hz. It features brushless excitation and operates at 3000 RPM, suitable for various applications.

Overview

Reliable Power Generation

The GFF-KT4000 is a robust power generator engineered for consistent and dependable electricity supply. Designed with durability in mind, it features an efficient cooling system that ensures optimal performance even under demanding operational conditions. This unit is perfectly suited for various professional applications requiring stable and reliable power output.

Performance Metrics

Rated Power

4000 W

Rated Power

Rated Voltage	230 V
Rated Frequency	50 Hz
Rated Current	17.4 A

Technical Specifications

Excitation Mode	Brushless excitation
Rotation Speed	3000 RPM
Phase Type	Single-phase
