

400mm Centrifugal Fan Impeller

This centrifugal fan impeller is designed for HVAC and industrial ventilation systems. It features a forward-curved blade design for efficient airflow.

Product Overview

High-Efficiency Airflow Solution

This 400mm centrifugal fan impeller is engineered for high-performance ventilation and HVAC applications. Featuring a forward-curved blade design, it excels at moving large volumes of air while maintaining lower noise levels. Constructed from durable, lightweight materials, it is optimized for direct-drive configurations in professional industrial settings.

Technical Specifications

Impeller Diameter	400 mm
Blade Design	Forward-curved
Material Composition	Aluminum, Corrosion-Resistant

Performance Features

Primary Applications

- HVAC Systems
- Industrial Ventilation

Operational Highlights

400 mm
Diameter

Drive Configuration	Direct-drive
