

400x72.5Wx76 Rubber Track

This rubber track is designed for mini excavators, compact track loaders, and crawler dumpers. It features continuous steel cord technology and specially formulated rubber compounds for enhanced performance and reduced downtime.

Product Overview

High-Performance Rubber Track

Engineered for heavy-duty construction equipment, this 400x72.5Wx76 rubber track utilizes continuous steel cord technology and specialized rubber compounds to maximize durability. Designed to minimize ground pressure and disturbance, the track ensures a smoother, more comfortable ride while maintaining excellent traction. It is built to withstand demanding environments, reducing downtime and enhancing overall operational efficiency.

Technical Specifications

Track Width	400 mm
Pitch	72.5 mm
Number of Links	76

Construction Quality

Key Construction Features

- Joint-less multi-strand high tensile internal wire cables
- Computer-controlled vulcanizing process for consistent temperature and humidity
- Advanced rubber compounds for abrasion resistance
- Engineered lug patterns for decreased tearing

Performance Benefits

Performance Advantages

1 Low Ground Pressure	1 High Traction	1 Improved Ride Comfort
