

405W Monocrystalline Solar Panel for Home Energy Systems

This is a 405W monocrystalline solar panel designed for solar energy systems. It provides an efficient solution for reducing energy costs and promoting sustainable energy generation.

Product Overview

High-Efficiency Solar Solution

This 405W monocrystalline solar panel is engineered specifically for residential energy systems, offering a robust balance of power and reliability. Utilizing advanced cell technology, the panel maximizes energy harvest to help reduce household electricity costs effectively. Its durable construction ensures long-term performance, making it an ideal choice for sustainable home energy generation.

Technical Specifications

Rated Power Output

405 W

Power Output

Cell Technology	Monocrystalline
Primary Application	Residential, Home Energy Systems
