

4.0HP 2-Stroke Water Transfer Pump

This water pump is powered by a 4.0HP 2-stroke engine for efficient performance. It is suitable for agricultural, construction, and domestic use.

Overview

High-Performance 2-Stroke Water Pump

This robust 4.0HP 2-stroke water transfer pump is engineered for demanding applications including agricultural irrigation, site drainage, and heavy-duty water transfer. Its air-cooled engine design ensures reliable operation in various environments, while the portable 27kg frame allows for easy maneuvering. With a maximum capacity of 850L/min, it provides consistent flow and pressure for professional users.

Performance Metrics

Key Performance Metrics

850 L/min

Max Capacity

23 m

Total Head

8 m

Max Suction Head

Technical Specifications

Fuel System

- Unleaded gasoline
- 3.2L tank capacity

Engine Type	2-stroke, air cooled
Engine Power	4 HP
Starting System	Recoil

Physical Dimensions

Port Diameter	75mm (3 inch) suction and discharge
Weight	27 kg

Certifications & Usage

Recommended Applications	Agricultural Irrigation, Drainage, General Water Transfer, Construction
