Overview

High-Performance Rotary Drilling Rig

The 40m Kelly Bar Rotary Drilling Rig is a versatile machine engineered for deep foundation work and heavy-duty construction. It features a 360-degree rotating body and an automated mast verticality adjustment system for precise drilling operations. Designed with operator comfort and safety in mind, the cabin includes adjustable seating, optional climate control, and protective steel mesh.

Technical Specifications

Maximum Drilling Depth

40 m

Drilling Depth

Operational Capabilities

- 360-degree body rotation
- Automated mast verticality adjustment
- Integrated auxiliary hoist for material handling

Operator Environment

Cabin Features

- Adjustable operator seats
- Optional air-conditioning and ventilation system
- Steel knot protection net for safety

Compliance & Customization

Quality Certifications	CE, SGS, ISO
Manufacturing Support	Yes
