Product Overview

Compact Industrial Pressure Measurement

This 40mm pressure gauge is a precision instrument engineered for reliable performance in diverse industrial and commercial environments. Featuring a durable chrome-plated case, it offers superior resistance to corrosion and environmental wear. The gauge includes a highly visible red pointer for quick, accurate readings, making it ideal for pneumatic and hydraulic systems requiring consistent pressure monitoring.

Technical Specifications

Maximum Pressure Rating

7 MPa

Max Pressure

Mounting Configuration

Bottom • Back • Lower Back

Dial Size

40mm

Construction Materials

Component Materials

Component	Available Material Options
Case	Chrome Plated, SS304, SS316, Black Steel, Plastic
Window	Glass, Tempered glass, Safety glass, PC, Acrylic
Movement	SS304, Brass
Connection	SS316, SS304, Brass
Bourdon Tube	SS316, Phosphor Bronze

Customization & Features

Connection Thread Standards

- PT
- NPT
- G

Fluid Compatibility

Liquid Filled, Dry Type
