

420cc 13 HP Gasoline Engine

The 420cc 13 HP Gasoline Engine is designed for various applications, including generators and water pumps. It features a high-efficiency combustion system, easy starting, and low fuel consumption, ensuring long-lasting operation with minimal maintenance.

Overview

High-Performance 420cc Gasoline Engine

This robust 420cc gasoline engine is engineered for reliability and high-efficiency performance across a variety of power equipment applications. Designed for seamless integration into generators, water pumps, and machinery, it features an optimized combustion system that ensures low fuel consumption and easy starting. With a focus on durability and minimal maintenance, this engine provides a dependable power solution for long-lasting operation.

Technical Specifications

Maximum Power Output

13 HP

Power Output

Displacement	420 cc
Fuel Tank Capacity	6.5 L

Safety & Features

Safety Features	Automatic Low Oil Shutdown
-----------------	----------------------------

Design & Build

Design Highlights

- Compact size for easy integration
- Lightweight construction
- High-efficiency combustion system
- Durable build for long-lasting operation

Applications

Typical Applications

Generators • Water Pumps • Power Equipment
