

420cc Gasoline Engine for Generators and Water Pumps

This 420cc gasoline engine is designed for power generation and various industrial applications. It features a robust construction for durability and is engineered for efficient fuel consumption and reduced emissions.

Overview

High-Performance 420cc Gasoline Engine

This 420cc gasoline engine is engineered for reliable performance in power generation and industrial applications, such as driving water pumps and tillers. Designed with a focus on efficiency and durability, it features a robust construction and optimized combustion for lower emissions and reduced fuel consumption. With its easy-start recoil system and low-vibration operation, this engine provides a dependable power source for demanding professional environments.

Technical Specifications

Displacement	420 cc
Certifications	CE, Euro V

Key Features

Operational Benefits

- Easy to start
- Low vibration and low noise
- High-qualified raw materials
- Energy saving
- Optimized air intake for complete combustion

Suitable Applications

Generators • Water Pumps • Tillers • Rice Mills • Air Compressors

Maintenance

Air Cleaner Maintenance

Action	Interval
Clean air cleaner	Every 50 hours
Dirty/Dusty conditions	More frequently
