Overview

High-Performance 42W Multi-Device Charging

This 42W car charger is designed for professional users needing efficient power on the road, featuring dual USB ports and an integrated PD cable. It supports simultaneous output, allowing for the rapid charging of multiple devices through Quick Charge 3.0 and Power Delivery technology. Equipped with a smart chip for optimized power management, it ensures safe and reliable performance across a wide range of vehicle types.

Performance Metrics

Total Power Output

42 W

Max Output

Technical Specifications

PD Cable Output Profile

Voltage	Current
5V	3A
9V	2.6A
12V	2A

Input Voltage	DC 12V-24V
USB Port Output	QC3.0 + 2.4A

Design & Build

Charging Features

- Simultaneous multi-device output
- Smart chip optimization
- Quick Charge 3.0 support
- Power Delivery (PD) technology

Integrated Cable Length

100 cm
