

440V 20A IP56 Waterproof Double Pole Isolator Switch

This industrial isolator switch is rated at 440V and 20A. Its IP56 rating ensures it is waterproof and protected from dust.

Product Overview

Industrial Isolator Switch

This robust double pole isolator switch is engineered for demanding industrial environments where safety and reliability are paramount. Rated for 440V and 20A, it provides secure circuit isolation with an IP56 rating, ensuring superior protection against dust and water ingress. Designed for ease of use, it features a clear ON-OFF indication and an ergonomic operating lever suitable for harsh conditions.

Electrical Specifications

Rated Voltage	440 V
Rated Current	20 A
Pole Configuration	Double Pole

Environmental & Design

IP Rating
IP56

Installation Requirements

- Ensure operating lever and internal switch toggle are aligned in OFF position when installing cover
- Correct alignment ensures proper ON-OFF indication
