

44mm SMT Component Feeder for Samsung SMT Machines

This 44mm SMT component feeder is designed for use in Samsung SMT machines. It ensures accurate and reliable feeding of components during the surface mount technology assembly process.

ADDITIONAL IMAGES

Product Overview

Precision-engineered 44mm feeder for automated assembly lines.

Professional SMT Component Feeding

This high-precision 44mm component feeder is engineered for seamless integration with Surface Mount Technology assembly machines. Designed for accuracy and reliability, it ensures consistent component presentation to pick-and-place heads during automated PCB assembly. Its robust construction supports sustained high-volume production cycles in industrial electronics manufacturing environments.

Compatibility

Supported Machine Series

- CP40 Series
- CP45 Series
- CP60 Series
- SM320 Series
- SM321 Series
- SM421 Series
- SM471 Series
- SM481 Series

Technical Specifications

Feeder Width	44 mm
Available Condition Types	Brand New, Used
